

DATA LOGGERS & RECORDERS

EL-USB-TC

The **EL-USB-TC** measures and stores over 32,000 temperature readings from either a K, J or T type thermocouple. A thermocouple is attached via the thermocouple socket at the base of the unit.

EL-USB-RT

The **EL-USB-RT** measures temperature and relative humidity from -10 to + 60°C (+14 to +140°F) and 0 to 100%RH. The PC displays the temperature, humidity and dew point in real time and saves it to a file which can store up to 7 days worth of data.

Logbox-RHT & Logbox-RHT-LCD are dual channel data loggers with built-in temperature and relative humidity sensors. They use a high quality, industrial grade humidity sensor, for accurate and reliable operation in applications such as transportation, food & goods storage, process auditing, pharmaceutical, HVAC & others.
