

EM Series of Low Profile Digital Panel Meters

The EM Series features a range of low profile, splashproof and waterproof modules that are easily panel mounted, most using a single 5.5mm diameter hole & the bigger round units with a 32.5mm diameter hole.

Lascar provide a wide range of panel instruments.

There are many types of meters available with splashproof or waterproof options & different operating ranges & connection methods. Standard meters include voltmeters, loop powered, thermometers, timers & counters and dot matrix displays.
