

## Enercon ELF 3200 Series

The ELF 3200 replaces a multitude of specific meters which display voltage, frequency and current, as well as the respective voltmeter and ammeter switches.

The results of the ELF 3200 series are significantly reduced panel space, less wiring and lower costs due to multifunction.

The list of features on the ELF 3200 series includes

- One click installation
- Auto Scaling
- Universal operation
- True RMS
- Autoscrolling
- 3 phase wiring check
- User programmable parameters
- Dust proof casing

More advanced models also indicate energy and power factor.
