

Super Relay PLC

The industrial wireless remote control module offers 6 wireless remote control input points.

The removeable LCD (HMI with a seperate installation mounting rack) can easily be mounted on the door of a cabinet. The HMI display's alarm messages and real value's, the user can easily change the preset value's.

SR series has 20 I/O extension modules which can be extended to 82 I/O (50 inputs and 32 outputs).

Friendly programming software (Super CAD) which can be used very easily. It has a super simulation function.

Main Features:

- * Supply voltage: 12-24VDC or 110-240VAC
- * Output current: Relay 10A / Transistor 2A
- * Programming method: FBD
- * Program capability: 127 Blocks
- * Counter: 127
- * Timer: 127
- * RTC: 127 Switches
- * LCD display: 4 x 10 Characters
